- ▶ welded pressure sensor
- ▶ excellent accuracy
- ▶ robust and long-term stable

Optional versions

- ▶ pressure port
M20x1.5 or 9/16 UNF
- ▶ different kinds of
electrical connections

The precision pressure transmitter DMP 334i is a consistent further development of the approved industrial pressure transmitter DMP 334. Basic element is a thinfilmm sensor which is welded with the pressure port.

The integrated digital electronics compensates actively sensor specific deviations like non-linearity and thermal error.

It is therefore possible to offer a high pressure transmitter with excellent metrological qualities.

Preferred areas of use are

Plant and machine engineering
Test benches

Commercial vehicles and
mobile hydraulics
